PROFESSIONAL SUMMARY

Software Developer with experience across C#/NET systems, SQL-based applications, Azure cloud services, and enterprise software environments. Experienced in delivering internal business systems, data-driven applications, and workflow automation within public sector and enterprise organisations.

Strong background working in Agile-style teams, collaborating with stakeholders, and supporting production systems. Skilled at translating business requirements into reliable technical solutions with a growing focus on modern .NET (Core) development and backend SaaS architecture.

Currently transitioning into cloud-native C# backend engineering roles, with hands-on experience in ASP.NET systems, Dynamics 365 integrations, SQL development, and Azure-based workflows.

CORE SKILLS

Backend Development

- C# / .NET (ASP.NET, enterprise applications)
- SQL (queries, reporting, data modelling)
- API integration and backend workflows
- System design and data-driven applications

Cloud & Microsoft Stack

- Microsoft Azure
- Azure Logic Apps
- Dynamics 365 Finance & Operations
- Power Platform (Canvas and Model-Driven Apps)

Engineering Practices

- Agile / Scrum environments
- Debugging and production support
- System maintenance and enhancements
- Stakeholder collaboration
- Version control and deployment workflows

Additional Skills

- Legacy system support and modernisation exposure
 - Python automation and scripting
 - Data analysis and problem solving
 - Communication with technical and non-technical teams
-

PROFESSIONAL EXPERIENCE

Cotswold Carers

Domiciliary Carer — On Site

May 2026 – Present (Probationary Period)

- Supporting individuals in their homes with day-to-day care and wellbeing.
 - Assisting with personal care, companionship, and maintaining independence.
 - Building trust with service users through patience, empathy, and professionalism.
 - Following care plans and safeguarding procedures while adapting to individual needs.
 - Developing strong communication and time-management skills in a fast-paced care environment.
-

Self-Employed Software Developer

Remote | Sept 2024 – Present

- Designed and built software tools and automation scripts using Python.
 - Developed custom web applications and data-driven solutions for personal and client projects.
 - Built automation workflows to improve efficiency in repetitive processes.
 - Worked independently across full lifecycle: design, development, testing, and deployment.
 - Strengthening backend engineering skills with focus on APIs, data handling, and system design.
-

Alpine F1 Team

Stores Operative | On Site | July 2025 – March 2026

- Managed inventory systems supporting multiple departments during race operations.
- Ensured accurate stock traceability and real-time availability of critical equipment.
- Worked in high-pressure operational environment requiring precision and reliability.

- Supported fast-paced logistical workflows with strong attention to detail.
-

Origin Enterprises Plc

Junior AX Developer | Hybrid | July 2024 – Sept 2024

- Developed and modified data entities and forms within Microsoft Dynamics 365 Finance & Operations.
 - Built and maintained SSRS reports for business reporting and analytics.
 - Worked with structured enterprise data models and backend logic.
 - Supported system updates and deployment activities in production environments.
-

Somerset Council

Software Developer | Hybrid | Mar 2020 – Apr 2024

- Developed and maintained internal ASP.NET applications supporting business workflows.
 - Designed SQL-backed systems for data capture, reporting, and operational processes.
 - Built secure social care portal used by external professionals.
 - Developed COVID-19 tracking systems supporting frontline services.
 - Integrated Azure services and Logic Apps into enterprise systems.
 - Worked in Agile-style delivery teams with stakeholders across departments.
 - Supported debugging, maintenance, and production deployments.
-

Somerset Council

Power Platform Developer | Hybrid | Mar 2020 – Apr 2024

- Built Canvas and Model-Driven Apps integrated with SQL and enterprise systems.
 - Developed workflow automation using Power Automate and Azure Logic Apps.
 - Created internal tools for infrastructure visibility and reporting.
 - Supported integration between Microsoft cloud services and backend systems.
 - Delivered solutions in collaboration with technical and operational teams.
-

Morrisons

Retail Assistant & Deli Team Member | On Site | 2015 – Mar 2020

- Provided customer service in fast-paced retail environment.
- Operated checkout systems, handled payments, and ensured compliance procedures.
- Supported stock rotation and inventory management.

- Promoted to self-checkout supervisor role resolving technical issues.
-

EDUCATION

BSc Computer Science (2:1)

The Open University via Bridgwater & Taunton College | 2017 – 2018

HND Computing and Systems Development

Bridgwater & Taunton College | 2015 – 2017

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals
- SQL Fundamentals (SoloLearn)
